MASTER CATALOG

THE BIG TIME DIFFERENCE

BIG TIME STRIVES TO PROVIDE SUPERIOR QUALITY PRODUCTS THAT CUSTOMERS CAN FEEL CONFIDENT RECOMMENDING TO FAMILY AND FRIENDS TO ATTRACT DEVELOP AND GROW HEALTHY DEER. WE WORK HARD TO CREATE NUTRITIONAL PRODUCTS FROM FEED, FOOD PLOTS, SUPPLEMENTS, AND ATTRACTANTS, THAT CAN BE USED YEAR AROUND TO SEE LONG-TERM RETURNS. EACH PRODUCT IS STRATEGICALLY RESEARCHED AND FIELD-TESTED TO ENSURE PALATABILITY, NUTRITION AND THE SUSTAINABILITY BUCKS AND DOES NEED TO MAXIMIZE THEIR GENETIC POTENTIAL.

BIG TINE[®] TRIGGERED

PROTEIN + MINERAL ATTRACTANT

WITH
NITRO[®]
MINERAL & VITAMIN SUPPLEMENT

Big Tine TRIGGERED is a high protein-based attractant, with the proper balance of fat and fiber, and contains Big Tine's Nitro mineral supplement with a boost of added corn. For maximum intake, digestibility, and absorption, Triggered contains a research-proven prebiotic designed to enhance digestibility by increasing the nutrient supply. Triggered offers the attracting power to draw deer in and hold them where you want them. It's a great source of late season protein, when fed alone or mixed with other feeds. Triggered can be fed year around for scouting, or in front of trail cameras for herd inventory. Triggered is available in a 5 lb. bag in four powerful long-distance scents, Cherry Rush, Orange, Persimmon and Pear.

- 22% Protein
- 5% Fat
- 7% Fiber

BIGTINE® HAPPY HOUR

LIQUID

Nothing is more enticing than a refresher at happy hour! Big Tine's Happy Hour is a complete liquid mineral supplement that will attract, hold and keep deer coming back for another round, while providing essential antler building minerals. Happy Hour is an excellent standalone attractant or can be used to "juice" an existing mineral or feed site.

- Infused with Big Tine's exclusive Cherry Rush scent and flavor
- Pour over bare ground, decaying stumps and logs or existing mineral sites
- Super concentrated mineral attractant
- Replenish every 2-4 weeks

BIGTINE® CORN COATING

CHERRY ON TOP

Make any plain feed site a destination for deer with Big Tine Corn Coating. Simply mix with corn, protein pellets or any type of deer feed to add the smell and flavor attraction that Big Tine has become renowned for. Offered in two flavors, Cherry On Top with the always popular Cherry Rush & now by popular demand Orange Zing. A one pound can will treat 200 pounds of corn/feed. It can also be sprinkled over feed blocks or to super charge a mineral site.

- Available in two flavors – Cherry On Top and Orange Zing
- Mix evenly with any feed of choice
- Super Concentrated
- Recommended rate is 4 oz. per 50 lbs. of feed
- Convenient 2 oz. scoop included

CHERRY RUSH SCENT STICK

EXCLUSIVE BIG TINE FEED SCENT IN A CONVENIENT STICK

2.5 OZ
Item #: BT60
UPC: 015958993151
12 Per Case

Big Tine's unique and exclusive Cherry Rush scent has become a favorite of those feeding Big Tine products over the years. The amount of deer traffic is noticeable when this long-range aroma is in the air around feed sites. Now you can utilize that same attraction throughout the year with the Cherry Rush no-mess wax stick. The long-lasting wax stick holds scent longer and does not wash off easily like liquid scents. It keeps working even when you're not there.

Great as a cover scent or to condition deer in an area. Convenient size fits easily in a pocket or backpack. No spills or leaks to cause a mess like liquids.

Directions: Rub scent on boots, trees, legs of feeders or anywhere around your hunting area that you want attract game or cover your scent. Wax stick should be stored in resealable bag, when not in use, to prevent drying out and preserve freshness.

Tip: Rub on trees around field edges or high traffic areas prior to season to condition deer to the Cherry Rush smell. They will become more accustomed to the smell being in the area.

*Also works great for attracting bear without the use of bait.

NEW FOR 2023

EVASION

COVER SCENT

When you feed Big Tine, your deer become accustomed to our unique cherry rush flavoring and aroma. If the scent is in the air, they know it's time to eat. Now you can utilize that same attraction throughout hunting season. EVASION works to both cover human odor and attract deer. Why go into the woods smelling like urine, when you can come out smelling like cherries.

BIGTINE® FORTIFIED DEER BLEND

WHOLE GRAIN SUPPLEMENTAL FEED

WITH

NITRO®

MINERAL & VITAMIN SUPPLEMENT

Big Tine FORTIFIED DEER BLEND is the perfect combination of wholesome grains, vitamins & minerals to support your herd. Our goal is to help improve the health & longevity of your deer through high quality nutrition. To promote antler growth, you must first improve health. Big Tine FORTIFIED DEER BLEND provides essential fatty acids, antioxidants, Omega-3 & Omega-6, and a complete mineral & vitamin supplement which are shown to protect against heart disease, support immune response & reproductive function. Big Tine provides all eleven minerals that are found in deer antlers, helping them to reach their maximum potential. But we don't just want to grow your deer, we want to attract and hold them on your property! That's where our signature Cherry Rush flavor comes in. The aroma is irresistible to deer & they simply cannot get enough. Designed to be fed year-round, Big Tine may be utilized by using a feeder system, or simply pouring on the ground.

- Whole grains plus Nitro Mineral & Vitamin Supplement
- Supports antler growth and bone density
- Aids in doe lactation during fawning
- Infused with Big Tine's Cherry Rush scent and flavor
- Can be fed year around

BIGTINE® PROTEIN PLUS DEER BLEND

WHOLE GRAIN SUPPLEMENTAL FEED + ROASTED SOYBEANS

WITH

NITRO®

MINERAL & VITAMIN SUPPLEMENT

Big Tine Protein Plus FORTIFIED DEER BLEND gives your deer all the benefits of our original Fortified Deer Blend with an added protein boost from the addition of roasted soybeans, protein pellets and a higher concentration of Big Tine's Nitro Mineral and Vitamin supplement. Protein Plus provides an excellent source of fat and protein for bucks recovering from the rigors of the rut, and to get deer through the stressful months of winter. The healthier a deer is going into the spring, the quicker their body's can focus on antler growth and raising the next crop of fawns, instead of having to recover first. Protein Plus can continue to be fed year-around to assist in the key months of antler growth and doe lactation. Our signature Cherry Rush scent and flavor will help draw deer in and keep them coming back for more. Protein Plus can be fed using spin or gravity feeders, troughs or simply poured on the ground.

- Roasted soybeans and protein pellets for an added protein boost
- Higher concentration of Nitro Mineral & Vitamin Supplement
- Excellent source of fat and protein to aid in rut and winter recovery
- Supports antler growth and overall health
- Infused with Big Tine's Cherry Rush scent and flavor
- Can be fed year around

60 Per Pallet

THE EVOLUTION OF DEER HEALTH IS HERE WITH TRIAD OPTI-RUMEN

Experience the PLATINUM difference with Big Tine's all new TRIAD OPTI-RUMEN. TRIAD OPTI-RUMEN takes a multi-faceted approach to support gut health by maximizing the efficiency of nutrient absorption. TRIAD OPTI-RUMEN contains prebiotics that assist deer in rumen function, that aids in more nutrient utilization, which allows them to get more out of the forages, browse and feed they consume.

These prebiotics also promote digestion and the utilization of nutrients to boost protein supply and enhance digestibility. Other pre and probiotics in TRIAD OPTI-RUMEN work to reinforce gut integrity by supporting good bacteria and promoting overall health and performance. These components help small ruminants thrive and reach their genetic potential while assisting in better immunity and more nutrient utilization. Finally, TRIAD OPTI-RUMEN contains a revolutionary microbial protein technology that provides a complete protein that satisfies a ruminant's requirements for all essential amino acids, containing an array of highly digestible essential and non-essential amino acids that aid in palatability, gut health and antler development. By capitalizing on nutrient absorption and supporting gut health the end result is better conditioned deer, healthier does, improved transfer of immunity from does to fawns and optimized genetic potential (body size & antler growth).

- Prebiotic
- Probiotics (GA of 450 M CFU/LB)
- Yeast Culture (GA of 30 M CFU/LB)
- Key Amino Acids
- Chelated/Organic Trace Minerals

BIGTINE[®]

NITRO[®]

MINERAL & VITAMIN SUPPLEMENT

NITRO[®]

Big Tine NITRO[®] Mineral & Vitamin Supplement contains the essential trace mineral nutrients and key vitamins that deer need. Big Tine NITRO[®] is powered by a unique mineral management innovation that offers a range of trace minerals that provide mineral nutrition in a form as close to nature as possible. These trace minerals are easily absorbed and readily metabolized, to optimize overall health and genetic potential. This unique combination of trace minerals (zinc, manganese, copper, iron and cobalt) are co-factors in enzymes critical to the deer's defense system, growth and reproduction. This system offers a higher bioavailability than inorganic minerals, reduces concerns about negative mineral interactions, and supports mineral retention and tissue reserves. This organic approach allows minerals to be readily absorbed, stored and utilized by deer. Big Tine NITRO[®] also uses the most proven form of organic selenium supplied in a form that can be more readily stored in tissues than sodium selenite. Selenium plays an essential role in metabolism, orchestrating normal growth, supporting normal reproduction, neutralizing free radicals and supporting the body's normal defense mechanisms against infection. Selenium allows animals to optimize health status during periods of increased demand. Infused with Big Tine's Cherry Rush scent and flavor, Nitro will draw deer in and keep them coming back. The

highest consumption rate is typically February through September.

- Chelated/Organic Trace Minerals for better absorption
- Organic Selenium for greater utilization
- Higher bioavailability
- Designed to optimize overall health and genetic potential
- Infused with Big Tine's Cherry Rush scent and flavor
- Highest consumption from February through September
- Easy to carry handle

20 LBS
Item #: DB30
UPC: 015958989949
100 Per Pallet

All the great antler building components found in Big Tine's NITRO[®] grainular mineral, pressed into a convenient and ready to use 20 pound brick. When hunters want to supplement but are faced with issues like not living near their hunting property or simply not having the time to recharge mineral sites regularly, the NITRO[®] Mineral Brick fills that void. Deer are able to consume the brick and continue using the site long after the brick is gone due to the nutrients that are leached into the soil.

- Provides organic trace minerals in a form as close to nature as possible & are easily absorbed, stored, utilized by deer.
- Selenium enriched yeast that helps optimize a deer's health status during periods of increased demand.
- Powerful scent and flavor from Big Tine's proprietary Cherry Rush.
- Long lasting

BIGTINE[®] FORTIFIED DEER BLOCK

20 LBS
Item #: BT21
UPC: 015958993144
100 Per Pallet

Big Tine's Fortified Deer Block is the perfect combination of wholesome grains, vitamins & minerals. The Block provides everything in Big Tine's proven Fortified Deer Blend, in a pressed form. Consisting of corn, black oil sunflower seeds, milo, Nitro mineral supplement, we've added even more fat & protein along with molasses for a sweeter palatability. The convenient 20 lb. size is easy to carry to remote locations to create a feed site anywhere and will last longer than feed alone. Like all Big Tine feed products, the Fortified Deer Block is infused with our exclusive Cherry Rush scent and flavoring for longer range attraction.

- Loaded with corn, black oil sunflower seeds and milo
- Can be used alone or with any Big Tine feed or Big Tine Triggered attractant
- Great balance of protein (13%), fat (5%), and fiber (10%)
- Can be fed year-round

NEW FOR 2023

RAISING THEM RIGHT

As a dad, in today's world, I've always felt that it is my number one job to not only prepare my children for the world and their futures, but to show them a way of life that I've lived. By doing this, this creates an opportunity for my children to naturally be given the chance to grow a passion and a love for the things that I love to do and am passionate about. Just like my dad and grandfathers did for my brother and I.

Growing up, I was raised on a Family Operated Dairy farm in Northeast Ohio. My brother and I were introduced to the farming and outdoor lifestyle from day one and that's a childhood life that I'll cherish forever. Watching our parents and grandparents work on the farm daily, provided us a sense of why "hard work always pays off" and as time went on and we became older and more involved on the farms, we soon experienced this saying firsthand.

Because of the experiences on the farm, with hard work and the rewards that follow, my brother and I both quickly adapted this philosophy into our own lives and passions! We found early success in school and sports because of the upbringing and lessons learned from being raised outdoors and on the farm. As a dad of my own now, I couldn't think of any better gift than to give my boys the opportunity to learn and understand the value of hard work and the appreciation of the outdoors.

For the last six years, Easton has been following along with me on almost every farming and outdoor adventure possible. From blood trailing deer, to riding on my shoulders while checking trap lines and trail cameras, planting BigTine food-plots and putting out minerals and even sleeping in the cab of tractors, or combines, Easton has been involved in it all. To watch him grow up and grow a passion for the outdoors and hunting, at such a young age, is something that I'll cherish and appreciate forever and going into his sixth birthday, this past spring, I knew it was time to introduce him to being a hunter.

For Christmas, I bought Easton a crossbow and it was game on! All spring and summer we practiced and prepared. He and his younger brother Keaton, who is also in love with the outdoors at the age of four, were involved in every aspect of preparing for Easton's first year of hunting. From planting food-plots, mowing clover, moving trail cameras, hanging stands and even cutting in entry and exit routes, these two boys were involved in it all, every step of the way!

As the season quickly approached, I knew that Easton was prepared and ready for his opportunity when the moment arose! Our plan for the first sits of the bow season, was to sit over a BigTine Foundation Clover plot in the evenings. Trail cameras had shown multiple bucks working their way into this food-plot every evening, so our hopes were high that Easton would get an opportunity at a buck, sooner than later. As the old saying goes, "patience always pays off" and soon Easton was about to learn this lesson!

The night of our first bow hunt provided Easton and I an incredible experience! We saw nine different bucks and seven does, but what was most important wasn't the amount of deer, but the look on Easton's face the entire night! The excitement and joy that watching those deer in our food-plot, that we planted together, provided a sense of hard work paying off for my son, as well as a smile that you couldn't wipe off, even if you tried! Quickly, Easton was seeing his hard work paying off and even though none of those bucks came close enough that first night, he knew that if he was patient, he would soon be given his opportunity.

The next evening we had the exact same wind and weather conditions, as the previous evening, so we decided to head back to the Foundation Clover. We had a good feeling walking into the stand that day, as we knew what an incredible evening the day before had provided, but Easton also knew that nothing was promised!

As the evening progressed, quickly deer started pouring out into our food-plot. Does and small bucks entered at the opposite end of the food-plot first, as they typically always do. We watched them for quite some time, but none of the bucks seemed to be interested in making their way towards us.

With about 20 minutes of legal shooting light left, I caught a glimpse of a buck working a scrape to our right! Quickly, I grabbed my Leupold binoculars and to my amazement, there was the wide nine point that we had photos of all summer! Frantically, I got Easton into position to be able to watch this buck work his scrape and explained what he was doing. Easton knew the difference between rubs and scrapes, but had never actually watched a buck work one before! He was so intrigued and excited to see this buck at 80 yards and to watch him work his scrape and licking branch. With light fading fast, I could only pray that he would finish working his scrape and then head our way!

As if this buck read the script, he finished working his scrape and licking branch and did exactly what we needed, he turned and headed directly down the field edge towards our location!

As a dad, there are certain moments that we dream about experiencing with our children and this was about to be one of those moments! I knew this buck was going to present Easton a shot and I've honestly never felt so many nerves and emotions hit my body all at once, in my life! But Easton, on the other hand, was as calm as a cucumber!

The buck fed his way to 25 yards in front of us and Easton was ready and waiting! All summer we had practiced his breathing and finger control on the trigger. He knew what shot angles to take and those to stay away from, so when this buck finally became broadside, Easton knew this was his time to shine! As he clicked the safety to "off" and got down on the bow I'll never forget how time stood still! Quietly, I asked him if he had a good rest and hold on the buck and with confidence and calmness, he looked over at me and stated, "I sure do dad! This is it! I'm ready"

It was at that moment that I realized, my first born, little boy was about to take the leap into being a hunter! A few seconds later, the bow went off and Easton made a great shot, right behind the shoulder! The buck mule kicked and ran off hard! Quickly, I turned my attention to Easton who was already letting me know that he saw the bolt hit right where he was aiming and he saw the "click" which should mean a good hit!

With teary eyes, I gave him the biggest hug and embraced the moment! As a father, these are moments that will only happen once and I was going to soak up every second of it! His excitement was through the roof, as he was shaking so hard he could barely speak!

We decided to check the bolt and mark blood and then come back in the morning to blood trail and recover Easton's buck. Easton understood that because of the blood color, he may have hit just a tad bit back and we needed to back out and be safe not sorry. Easton had been on numerous blood trails with me throughout his life and loves the process of doing so. He was extremely excited to learn that we would have some help the next day as well! My dad, two good friends, Easton's Aunt and Uncle, his Mom and brothers would all be joining us in the morning to help recover Easton's buck!

After a sleepless night, due to excitement and the unknown, we woke up to a beautiful sunny morning! Easton was as excited as I've ever seen him for everyone to meet at the farm and for us to go find his buck. Our plan was to go back to the last, marked blood and let Easton lead the way from there. Quickly, Easton got on new blood and started working the trail. Not long into the search my buddy Ryan and I spotted the buck up ahead, but didn't say anything to Easton, as we wanted him to find his first deer on his own. A few minutes later, Easton looked up and saw his buck laying dead! "Dad! Dad! There he is!!" And the party was on! Tears, clapping, cheering and a lot of celebration and pictures took place that morning and I couldn't have asked for it to go any other way! What a special moment and what a special buck!

As a dad, to watch my sons understand and appreciate the sacrifices and hard work that went into that buck is something I'll cherish forever! We did everything as a team and they understood that. Together, the three of us shared in this moment because of the hard work and dedication to the outdoors that we had and that is something that I'll pride myself on, as their father. Easton not only learned the value of hard work paying off, but also patience and perseverance, as well. To say that these boys' dad was a proud dad that day, would be a huge understatement! I don't think I could ever be more proud and I encourage all of YOU out there to take your children outdoors and teach them all that you can about it! This is one of the greatest gifts they could ever receive.

FOOD PLOT

GROW YOUR PLOT

GROW YOUR DEER

FOUNDATION CLOVER®

PREMIUM CLOVER MIX

Foundation Clover is a mix of five different varieties of clover designed to provide a year-round, nutrient-dense, high protein forage with maximum tonnage that's highly palatable to deer. Foundation Clover will provide the essential protein and minerals bucks need for antler growth and does need for lactation, when they need it the most, to help develop larger and stronger fawns. It's no secret that clover is often the foundation to a successful food plot program and no corners were cut in designing this mix. The three perennial clovers in the Foundation Clover mix have excellent seed vigor with a persistent, high drought tolerance and can last up to five years or more. The two annual clovers provide a faster growing and sweet forage as the perennial clovers develop. Field evidence has shown these annual clovers to be bigger and thicker than other clover cultivars tested.

- Great for both deer and turkeys
- Establishes quickly with vigorous stolon growth
- Persistent, high drought tolerance
- High protein for developing antlers and growing larger, healthier fawns
- Perennial that can last up to five years
- Excellent for frost seeding
- Plant Spring or Fall

4 LB BAG
Item #: BT35
UPC: 015958990709
6 Per Case
Covers up to 1/2 Acre

PERENNIAL

CLOVER SELECT®

CLOVER & CHICORY MIX

Clover Select is a premium perennial mix of the high protein clovers found in Foundation Clover with the added punch of highly digestible chicory. Plant diversity is critical in deer food plots and the additional chicory boosts the overall protein and mineral content of the plot. The drought hardy chicory withstands heavy grazing will continue to provide needed nutrition during the dog days of summer due to the deep roots and durability, if there is a dip in clover production. Clover Select provides essential year around nutrition to allow your deer to be the healthiest they can be during the most critical times of the year. Excellent attraction for Fall deer hunting and Spring turkey hunting. Clover Select will Attract, Develop and Grow your herd.

- High protein deer need
- Persistent drought and cold tolerance
- Perfect mix for year around nutrition and attraction
- Highly palatable for deer and turkey
- Perennial that can last up to five years
- Plant Spring or Fall

2 LB BAG
Item #: BT36
UPC: 015958990716
12 Per Case
Covers up to 1/4 Acre

PERENNIAL

BORDERLINE™

SCREEN / FUNNEL / BEDDING MIX

Borderline is a mix of fast-growing summer annuals that can reach up to ten or more feet in a single growing season that stands tall through fall and winter. Privacy, stealth and strategy all come into play for hunters searching for the right ways to make deer feel safe enough to come within range. Borderline allows you to be as creative as you want in meeting your properties needs and goals.

- Used to create travel funnels, bedding areas, or divide large plots
- Provides visual barriers from roads and access points to your stand location
- Conceal ground blinds
- Great for adding cover while more permanent screens, such as trees, develop
- Extremely drought hardy
- Easy to establish, late spring into early Summer
- Stands tall late into Winter
- 1/4 Acre plants approximately 12 FT x 300 yards
- Plant when "soil" temps are 60° or higher for best germination

5 LB BAG
Item #: BT43
UPC: 015958991942
6 Per Case
Covers up to 1/4 Acre

ANNUAL

BUCK BRUNCH™

NO - TILL FOOD PLOT MIX

Buck Brunch takes away the issues many food plotters face of needing large equipment to plant a food plot. Buck Brunch's no-till formula allows hunters to strategically place small, private food plots where they need them with as little equipment as hand tools. Buck Brunch is great for remote plots around your tree stand, old clearings, paths in the woods, or corners of fields. Buck Brunch needs 3-4 hours of filtered sunlight per day, and good seed to soil contact.

- No-Till Mix
- Great for early and late season
- Easy to establish and fast growing
- Attracts and holds deer in your hunting areas
- A mix of select forages to provide ultimate attraction throughout the hunting season
- Fall annual planting, but can be planted in the Spring as a soil amender

4 LB BAG
Item #: BT04
UPC: 015958990747
6 Per Case
Covers up to 1/4 Acre

ANNUAL

LAST STAND™

LATE SEASON BRASSICA MIX

Last Stand is a unique mix of attractive brassicas, designed for late season hunting spots when the temperatures start to drop. When other food sources are running out, Last Stand will just be getting started, providing deer with the energy they need during the winter months. To make a full season plot, Last Stand works well when mixed with cereal grains or BigTine's Foundation Clover.

- Massive amounts of lush forage
- Highly drought resistant
- Able to withstand extremely cold temperatures
- Attracts and holds deer through the winter
- Establishes quickly
- Fall/Winter Annual

2 LB BAG
Item #: BT29
UPC: 015958990754
12 Per Case
Covers up to 1/3 Acre

ANNUAL

MAIN EVENT™

PREMIUM BRASSICA MIX

Main Event is a premium Fall/Winter annual mix of high producing forage brassica with the late season attraction of tubers. This robust mix is loaded with various premium brassica varieties to provide the critical forage tonnage, protein, carbohydrates and other critical nutrients deer need from late Fall throughout the Winter. Main Event stays green when the temps drop and other planted and natural forages begin to lose their value to aid your herd in being as healthy as they can going into Spring. The added bonus of Main Event's incredible attractiveness will make this one of the best kill plots you've ever hunted over.

- Excellent kill plot
- Withstands cold temps others can't
- Establishes quickly and grows fast
- Provides needed nutrition through the season and Winter
- Highly drought resistant
- Fall/Winter Annual

4 LB BAG
Item #: BT45
UPC: 015958992543
6 Per Case
Covers up to 1/2 Acre

ANNUAL

LOCK DOWN™

WINTER PEAS MIX

Lock Down is a mix of three white flower varieties of peas, cereal grains and turnips designed for maximum attraction. Lock Down jumps out of the ground to give you a leafy, highly palatable, high protein plot in the early season, through the rut and into Winter. The lush forage provided in this mix will make fence-jumpers out of your neighbor's deer.

- Exceptional, high tonnage forage growth
- Superior winter hardiness
- White flowered peas for better palatability and digestibility
- Turnips for late season food source
- Forage oats and winter wheat for early season attraction
- Fall/Winter Annual

8.5 LB BAG
Item #: BT38
UPC: 015958990730
4 Per Case
Covers up to 1/4 Acre

ANNUAL

LONG RANGE®

CEREAL GRAINS / BRASSICA / CLOVER MIX

Long Range is the one annual that everyone should be planting if they're looking to attract deer. The extremely attractive cold tolerant cereal grains, brassica and clover will draw deer from the early to the late season with its attractive highly palatable forage. Not only will your deer benefit from the massive amount of forage tonnage this plot produces, the tubers will carry them deep into the Winter. Long Range is easy to plant and is attractive from the time it comes out of the ground through the full season.

- Easy to plant and establishes quickly
- Excellent early and late season attraction
- Includes cold tolerant oats, winter hardy wheat, more palatable white flowered crimson clover, and forage brassicas such as radish, turnips, kale, and rape
- Fall & Winter annual
